

20-Year Analysis Initiative

February 14, 2005

Purpose

- Further evaluate robustness of proposed projects
- Evaluate longer term reliability benefits of Access alternatives
- Obtain longer term perspective of system limitations/needs

The Process

- Model building
 - Start with TYA 2013 model
 - Build sequentially, every other year (2015, 2017, etc. out to 2025)
 - Primary challenge is matching resources to load
 - Not masking limitations/needs with unidentified generation
- Assessing proposed reinforcements along the way
- Developing/refining reinforcement alternatives

Schedule

- Model building thru Sept
 - underway – working on 2015
- Evaluate Access alternatives July-Aug
 - proposal: use 2019 model
- Develop/refine other network reinforcements thru Dec

Your Involvement

- Planned meetings
 - May
 - August
 - November
