

## ATC – Potential Tariff Filing

---

- ATC reviewed its operating agreements, associated tariffs and operational procedures to determine what changes, if any, were needed prior to Day 2 market start up.
- Process is still on-going in several areas, waiting for input from member utilities regarding how they wish to proceed in the future.

# ATC – Potential Tariff Filing

---

- ATC is planning to seek FERC approval to extend redispatch and must-run provisions under limited circumstances when MISO begins Day 2 market operation
  - In the event the MISO implements its reversion plan (i.e: market is not in operation for a period of time), ATC could:
    - Implement redispatch using its current Attachment K procedures
    - Implement must-run provisions of must run agreement
  - Tariff filing
    - Filing expected in early March
    - Filing will seek to continue current Attachment K procedures
    - Filing will seek to extend the provisions of the must run agreements beyond 2005.
    - Appropriate arrangements for designating must-run units would be made in by November 1 of the prior year
